## Work Experience

### State Department

Algiers, Algeria

#### Software Engineer

August 2018 - now

- Worked as a software engineer at a State Department for five years, with a team of many other developers
- Developed several key software solutions critical to the Department's operations, including a Trainings Management System, Electronic Documents Management System, and HR Management System, utilizing version control systems to manage source code and collaborate effectively
- Collaborated with other software engineers and stakeholders from various departments within the state, gaining experience in teamwork and project management
- Gained experience in database management, network protocols, and pieces of equipment with an overview of Big Data and AI solutions
- Saved the Department a significant amount of money by developing these systems in-house, Helped the institution reduce its IT dependencies by 45% and resulting in a 70% reduction in paper usage and a transition to a paperless environment
- Assisted the Department in the planning and programming phase of major equipment acquisition projects
- Utilized my technical expertise to develop a new cloud computing solution for the institution, by leveraging cloud computing architecture and open source solutions to create a reliable and efficient platform
- Learned how to write technical and administrative reports and handle administrative procedures
- **Technical Skills:** Web technologies, Git, Linux, SQL/PLSQL, Oracle
- **Soft Skills:** Leadership, Problem-solving, Time Management, Communication, Presentation and writing skills

### Algérie Telecom Company

Algiers, Algeria

#### Software Engineer

July 2017 - June 2018

- Recruited as a junior developer at Algeria Telecom
- Quickly established as a valuable member of the team, took on increasingly complex projects, and expanded technical skills over time by making significant contributions to the company's development efforts as a junior developer
- Developed a prototype solution for handling communication between heterogeneous systems
- Contributed to the development of many websites, web applications, and mobile apps, utilizing a variety of web development technologies to create reliable and user-friendly interfaces
- Worked on projects including e-commerce websites, customer service portals, and mobile apps for managing accounts and services
- **Technical Skills:** Java, Linux distributions, Web technologies, C/C++
- **Soft Skills:** Teamwork, Time Management, Communication, Logical Thinking
